SUMMARY

Frontend Developer with 5+ years of experience building scalable web applications using Vue JS and React JS. Strong expertise in JavaScript (ES6+), micro-frontend architecture, and performance optimization. Experienced in developing complex UI systems, integrating REST APIs, and delivering production-grade applications in Agile environments.

KEY ACHEIVEMENT

- ⇒ Improved application performance by ~30% through optimization techniques like lazy loading and efficient state management
- ⇒ Developed reusable UI components reducing development effort by ~25% across multiple modules
- ⇒ Implemented real-time communication using WebSocket, improving data update efficiency
- ⇒ Successfully delivered 4+ production-grade applications with scalable architecture
- ⇒ Reduced API response handling time by optimizing frontend data flow and rendering logic

ACADEMIC

Graduation

Bachelor of Technology (B.Tech) - 2021

Shree Yash Pratishthan College of Engineering and Technology, Aurangabad.

Dr. Babasaheb Ambedkar Technological University.

SKILLS

- **Frontend:** Vue.js (Vue 2 & Vue 3), React.js, Nuxt.js
- **Languages:** JavaScript (ES6+), TypeScript
- **State Management:** Redux Toolkit, Vuex, Pinia
- **Routing:** Vue Router, React Router
- **UI & Styling:** HTML5, CSS3, Tailwind CSS, Bootstrap, Vuetify
- **Tools:** Git, GitHub, Vite, Webpack, Storybook, Azure DevOps, NPM
- **Testing:** Vitest, Unit Testing
- **Concepts:** Compositions API, Micro-Frontend (Module Federation), REST API Integration, Performance Optimization, Lazy Loading, Code Splitting, Agile, SCRUM, PWA

EXPERIENCE

Senior Software Engineer – Neosoft Technologies (OCT 2024 to Till Date)

The Souled Store (E-commerce Platform)

- Developed scalable e-commerce features using Vue.js 2 with REST API integration
- Built interactive 3D shoe customization feature using .glb models to enhance user engagement
- Managed application state using Vuex for complex UI workflows
- Integrated Coralogix for real-time error monitoring and debugging
- Developed CMS-driven feature toggle system for dynamic feature control

SDE II – Ariqt International (FEB 2023 to JUL 2024)

CowManager Platform

- Collaborated across multiple teams including Client App, Shell App, and shared UI library
- Developed micro-frontend architecture using Module Federation
- Built reusable UI components using Vue 3 (Composition API) and Storybook
- Contributed to Vue 2 to Vue 3 migration improving maintainability
- Integrated CI/CD pipelines using Azure DevOps
- Participated in client discussions and Agile ceremonies

Associate Software Engineer – Clixlogix Technologies (JUN 2022 to DEC 2024)

Payment Invoice System

- Developed scalable invoice management system with real-time updates using WebSocket
- Integrated REST APIs for invoice creation, updates, and tracking
- Built comment system with CRUD operations, mentions, and notifications
- Improved UI responsiveness and reduced data load time
- Optimized rendering for handling large datasets efficiently

Software Engineer – Iorta Technologies (MAR 2022 to JUN 2022)

Insurance Platform (TATA AIG)

- Developed responsive UI using Vue.js and Vuetify
- Built complex forms with validation improving data accuracy
- Integrated backend APIs for policy and audit workflows
- Improved user experience through structured UI logic

Junio Software Engineer – Wissen Infotech (SEP 2021 to MAR 2022)

Xcelerate Data Platform

- Built high-performance data tables using AG Grid handling large datasets
 - Developed reusable table components for scalability
 - Implemented dynamic column configuration and optimized rendering
 - Improved data visualization and interaction speed
